BRING IT ON

Residing within the metallic shell is the latest 10th Gen Intel® Core™ processors and cutting edge GeForce RTX™ graphics, DDR4 memory at 2933MHz and ultra-fast PCIe NVMe storage. The result is a laptop ready to take on any challenge set before it.

KEEP COOL

All Predator laptops utilize our custom-engineered cooling technology. The latest generation's new design reduces noise while increasing airflow – allowing you to maximize your performance, no matter the task. CoolBoost™ also monitors temps and adjusts fan speed accordingly during heavy loads.

ONE SPEED: FAST

Speed is at the core of this laptop with the display leading the charge. How? We've chosen a 300Hz panel with a 3ms response time[1] empowered with NVIDIA® G-SYNC® Technology[2]. Farewell blur and hello clear, crisp high-octane gameplay.

Disclaimers:
1 - Non-native response time. Achieved via LCD Overdrive.
2 - Specifications may vary depending on model and/or region. All models subject to availability.
3 - Top Cover, base and bottom of keyboard are metallic.
